RE: Garland County Landfill
AFIN # 26-00405
Permit # 0300-S4
March 14, 2023 Inspection
B&F No. 22402400

Dear Ms. Davenport:

The letter responds to the Violation Notice, dated March 27, 2023, issued to the Garland County Landfill (GC). The Violation states that a second working face for waste disposal was witnessed during an inspection on March 14, 2023. The Violation alleges that the multiple working faces constitutes a violation of Rule 607(c). GC fundamentally disagrees with the allegation reported in the Violation.

Arkansas Department of Environmental Quality Office of Land Resources (DEQ) and GC conducted a conference call December 6, 2023. During the call GC specifically requested authorization to place asphalt shingles, a class 4 waste stream, as a barrier layer to the newly constructed landfill waste disposal cell. Authorization was granted by ADEQ during the call. The barrier layer provides excellent stability both in terms of erosion and structural fill as well as enhancing the bottom liner with the impermeable characteristics of roofing shingles. This second working face consists of shingles and is intended to comply with the terms of the conference call.

501/622-3600 • Fax: 501/622-3799 • dmahoney@garlandcounty.org
501 Ouachita, Room 210 • Garland County Courthouse
Hot Springs National Park, Arkansas 71901

GC requests that the violation be rescinded and this letter serves as the county's written request for verification of the previously approved second working face as described above.

Please do not hesitate to contact me if you have any questions or need additional information.

Respectfully submitted,

GARLAND COUNTY

Judge Darryl Mahoney
