

ADEQ MINOR SOURCE AIR PERMIT

Permit No. : 1306-AR-7
IS ISSUED TO:

Kimberly-Clark Corporation
Maumelle, AR 72113
Pulaski County
AFIN: 60-00915

THIS PERMIT IS KIMBERLY-CLARK CORPORATION'S AUTHORITY TO CONSTRUCT, MODIFY, OPERATE, AND/OR MAINTAIN THE EQUIPMENT AND/OR FACILITY IN THE MANNER AS SET FORTH IN THE DEPARTMENT'S MINOR SOURCE AIR PERMIT AND THE APPLICATION. THIS PERMIT IS ISSUED PURSUANT TO THE PROVISIONS OF THE ARKANSAS WATER AND AIR POLLUTION CONTROL ACT (ARK. CODE ANN. SEC. 8-4-101 *ET SEQ.*) AND THE REGULATIONS PROMULGATED THEREUNDER, AND IS SUBJECT TO ALL LIMITS AND CONDITIONS CONTAINED HEREIN.

Signed:

Anthony G. Davis
Interim Chief, Air Division

Section II: INTRODUCTION

Summary of Permit Activity

Kimberly-Clark Corporation owns and operates an infant care product manufacturing facility (NAICS 313230) located at 500 Murphy Drive in Maumelle, AR. This permit modification adds estimated stack emissions of VOCs, including trace amounts of HAPs, to the current permitted emissions from identified point sources, bringing permitted VOC emissions up to 95.6 tpy from 78.9 tpy. These emissions are from waste material that is not shipped out as finished product.

Process Description

There are two nonwoven manufacturing processes at the Kimberly-Clark facility, Coform 1 and Coform 2. Coform 1 consist of three coform banks. Coform 2 consists of two coform banks, followed by five elastomer banks, which are followed by two coform banks.

In each of the seven coform banks on Coform 1 and Coform 2, two air streams are mixed in each bank. One air stream contains polymer pellets that are melted and extruded into microfiber-sized filaments through two dies and met with a hot air stream, heated by Process Air Heaters (SN-05, SN-12, and SN-19) Approximately once per week, the dies are removed and cleaned through the Equipment Cleaning Processes (SN-04, and SN-20). The other air stream contains fiberized wood pulp fiber. The mixed air streams are rapidly cooled with ambient air and a wetting agent (primarily water) causing resolidification of the polymer filaments to form a composite web of intermixed polymer and wood pulp traveling on a moving screen (forming wire). On Coform 1, the finished web is then slit to size and wound on rolls for processing into the finished disposable products.

The air emissions that result from the nonwovens process consist of particulate matter and volatile organic compounds (VOCs). The particulate matter consists of polymer particles and wood pulp fiber particles that are entrained within the exhaust airflow, and hydrocarbon waxes that are condensed byproducts of the volatilization of polymer.

The VOC portion of the gas stream consists of volatilized polymer and its breakdown products produced from electrically heating the polymer pellets. Previous analysis at existing Kimberly-Clark operations has shown that the VOCs consist of saturated unreactive alkanes (C_nH^{2n+2}) which are volatile only because they are subjected to elevated process temperatures. To reduce VOC emissions, polymer use and melting temperature are minimized to ensure good product quality and limit the amount of polymer volatilized.

Kimberly-Clark Corporation - Maumelle
Permit #: 1306-AR-7
AFIN: 60-00915

An exhaust unit located below the forming wire of each coform bank captures the bulk of the air emissions from each of the seven banks. Each of the three bank exhausts on Coform 1 are drawn through two drum filters operated in parallel. The two drum filters from each bank discharge through the existing stacks SN-06, SN-02, and SN-03, respectively. On Coform 1, an exhaust unit located above the forming wire captures the balance of the air emissions of the three banks and draws them through two drum filters operated in parallel. The two drum filters from the above-wire exhaust discharge through the existing stack SN-09.

Each of the two existing coform banks on Coform 2 have one drum filter per bank and discharge the emissions through the stacks SN-10 and SN-11. The two additional coform banks on Coform 2 will have one drum filter per bank and discharge through the stacks SN-14 and SN-15.

The new elastomer section on Coform 2 will discharge from three new stacks. Two exhaust units located below the forming wire of Banks 3A, 3B, 3C and 3D will capture the bulk of the air emissions. Air emissions will discharge through new stacks SN-16 and SN-17. A fume exhaust located above Bank 4 will discharge through new stack SN-18.

Dust that builds up on the dirty side of the filter fabric of the twelve drum filters is vacuumed off by drum stripper fans and is sent to a final collector Mikro-pulsaire reverse pulse system baghouse for dust consolidation and disposal. Filtered air from the baghouse is discharged through stacks SN-07 and SN-13.

Dust collected on the outside of the bags of the baghouse is collected into a dust baler through a rotary airlock. The dust emissions from the dust baler will be reticulated into the below-wire exhausts.

Two house keeping systems are used for general cleanup of polymer and wood pulp fiber. Each of the Vacuum Blowers has one baghouse per blower and filtered air from the baghouse is discharged through stacks SN-21 and SN-22. Building ambient air is provided by steam produced in the natural gas fired boiler (SN-08).

This permit includes two non-point sources of emissions not included in previous permits. These come from aqueous solutions used to impregnate the wiping products to aid in cleansing. Most of the solvents incorporated in the solution are actually trapped in the sealed containers and not emitted from the facility. Since it is difficult to measure actual losses in the plant air exhaust, Kimberly-Clark has requested the maximum possible evaporation rates based on plant wastes, which are estimated at 7% of total output. VOCs from Huggies products have been designated as NPS-1 and VOCs from Cottonelle products have been designated as NPS-2

Regulations

The following table contains the regulations applicable to this permit.

Regulations
Arkansas Air Pollution Control Code, Regulation 18, effective February 15, 1999
Regulations of the Arkansas Plan of Implementation for Air Pollution Control, Regulation 19, effective February 15, 1999

The following table is a summary of emissions from the facility. This table, in itself, is not an enforceable condition of the permit.

Total Allowable Emissions

TOTAL ALLOWABLE EMISSIONS		
Pollutant	Emission Rates	
	lb/hr	tpy
PM	5.6	23.0
PM ₁₀	5.6	23.0
SO ₂	0.3	0.3
VOC	24.8	95.7
CO	0.9	3.4
NO _x	1.5	6.9
Total HAP	0.05	0.16

Kimberly-Clark Corporation - Maumelle
Permit #: 1306-AR-7
AFIN: 60-00915

Section III: PERMIT HISTORY

Permit 1306-A, the initial permit for the facility, was issued on April 13, 1992.

Permit 1306-AR-1, issued on August 27, 1993, covered the addition of a new manufacturing line.

Permit 1306-AR-2 was issued on August 10, 1995. This permit covered the addition of a new process bank to the facility.

Permit 1306-AR-3 was issued on August 26, 1997. This permit allowed for the installation of a new source, SN-09, the usage of a new raw material and an increase in natural gas usage.

Permit 1306-AR-4 was issued on August 3, 1998. This permit allowed Kimberly-Clark flexibility in their permit limits and added a new nonwoven manufacturing process.

Permit 1306-AR-5 was issued on October 31, 2000. This permit was issued to add to the existing equipment an elastomer extrusion process and two additional polymer extrusion banks. The new sources were SN-14 and 15, the nonwoven process, both controlled by drum filters. Also, sources SN-16, 17, and 18 which account for emissions from the elastomer process were added. Sources SN-19 and SN-20, a process air heater and an equipment cleaning process, respectively were also added. Sources SN-21 and 22, vacuum blowers, were new equipment added in the modification. In addition to the new sources, the facility also modified the emissions for existing sources SN-04, 10, 11, and 13.

Permit 1306-AR-6 was issued on June 14, 2002. Kimberly-Clark requested modification of their permit to update VOC emission factors for source numbers SN-10, SN-11, SN-16, SN-17, and SN-18, reflecting VOC stack testing performed at the Maumelle facility the previous year. The facility reduced VOC emissions to 78.0 tpy. An administrative change to the permit language associated with Specific Condition #1 and Specific Condition #2 was made. The facility requested the inclusion of the phrase "Compliance with these limits shall be demonstrated by compliance with Specific Conditions 3-10."

Section IV: EMISSION UNIT INFORMATION

Specific Conditions

1. The permittee will not exceed the emission rates set forth in the following table. [Regulation 19, §19.501 et seq., effective February 15, 1999 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

3. Visible emissions may not exceed the limits specified in the following table of this permit as measured by EPA Reference Method 9. [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

SN	Limit	Regulatory Citation
All	5%	§19.503

4. The permittee will not cause or permit the emission of air contaminants, including odors or water vapor and including an air contaminant whose emission is not otherwise prohibited by Regulation #18, if the emission of the air contaminant constitutes air pollution within the meaning of A.C.A. §8-4-303. [Regulation 18, §18.901 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
5. The permittee will not conduct operations in such a manner as to unnecessarily cause air contaminants and other pollutants to become airborne. [Regulation 18, §18.901 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

Facility Wide Conditions

6. The permittee will not process more than 17,800 tons of product at the facility per consecutive 12-month period. Compliance with this condition will be demonstrated by compliance with Specific Condition #7. [Regulation 19, §19.705 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

7. The permittee will maintain monthly records which demonstrate compliance with Specific Condition #6. The permittee will update the records by the fifteenth day of the month following the month to which the records pertain. The permittee will keep the records onsite, and make the records available to Department personnel upon request. [Regulation 19, §19.705 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
8. The polymer throughput at SN-10, SN-11, SN-14 and SN-15 will not exceed 561.4 lb/hr per bank. Compliance with this condition will be demonstrated by compliance with Specific Condition #9. [§19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]
9. The permittee will maintain monthly records of the polymer throughput through sources SN-10, 11, 14, and 15. These records will include the amount of polymer processed by each source, the time each source was operated, and the monthly average of the hourly rate of the equipment. The permittee will keep the records onsite, and make the records available to Department personnel upon request. [§19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]
10. The facility throughput of solution used to manufacture the Cottonelle Wet Wipes will not exceed 10,794 tons per consecutive 12-month period. Compliance with this condition will be demonstrated by compliance with Specific Condition #11. [§19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]
11. The permittee will maintain monthly records of the Cottonelle Wet Wipes solution throughput. The permittee will keep the records onsite, and make the records available to Department personnel upon request. [§19.705 of Regulation 19 and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]
12. The permittee will not emit any HAP except in De Minimis amounts as defined by the Department (lb/hr HAP * 4.4 < relative toxicity). [§18.801 of Regulation 18, and A.C.A. §8-4-203 as referenced by §8-4-304 and §8-4-311]

Section V: INSIGNIFICANT ACTIVITIES

The following sources are insignificant activities. Any activity that has a state or federal applicable requirement shall be considered a significant activity even if this activity meets the criteria of §304 of Regulation 26 or listed in the table below. Insignificant activity determinations rely upon the information submitted by the permittee in an application dated May 15, 2000:

Description	Category
Equipment Cleaning Process	A-13

Section VI: GENERAL CONDITIONS

1. Any terms or conditions included in this permit that specify and reference Arkansas Pollution Control & Ecology Commission Regulation 18 or the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 et seq.) as the sole origin of and authority for the terms or conditions are not required under the Clean Air Act or any of its applicable requirements, and are not federally enforceable under the Clean Air Act. Arkansas Pollution Control & Ecology Commission Regulation 18 was adopted pursuant to the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 et seq.). Any terms or conditions included in this permit that specify and reference Arkansas Pollution Control & Ecology Commission Regulation 18 or the Arkansas Water and Air Pollution Control Act (A.C.A. §8-4-101 et seq.) as the origin of and authority for the terms or conditions are enforceable under this Arkansas statute.
2. This permit does not relieve the owner or operator of the equipment and/or the facility from compliance with all applicable provisions of the Arkansas Water and Air Pollution Control Act and the regulations promulgated under the Act. [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
3. The permittee will notify the Department in writing within thirty (30) days after commencement of construction, completion of construction, first operation of equipment and/or facility, and first attainment of the equipment and/or facility target production rate. [Regulation 19, §19.704 and/or A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
4. Construction or modification must commence within eighteen (18) months from the date of permit issuance. [Regulation 19, §19.410(B) and/or Regulation 18, §18.309(B) and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
5. The permittee must keep records for five years to enable the Department to determine compliance with the terms of this permit such as hours of operation, throughput, upset conditions, and continuous monitoring data. The Department may use the records, at the discretion of the Department, to determine compliance with the conditions of the permit. [Regulation 19, §19.705 and/or Regulation 18, §18.1004 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
6. A responsible official must certify any reports required by any condition contained in this permit and submit any reports to the Department at the address below. [Regulation 19, §19.705 and/or Regulation 18, §18.1004 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

Arkansas Department of Environmental Quality
Air Division
ATTN: Compliance Inspector Supervisor
Post Office Box 8913
Little Rock, AR 72219

7. The permittee will test any equipment scheduled for testing, unless stated in the Specific Conditions of this permit or by any federally regulated requirements, within the following time frames: (1) newly constructed or modified equipment within sixty (60) days of achieving the maximum production rate, but no later than 180 days after initial start up of the permitted source or (2) existing equipment already operating according to the time frames set forth by the Department. The permittee must notify the Department of the scheduled date of compliance testing at least fifteen (15) days in advance of such test. The permittee must submit compliance test results to the Department within thirty (30) days after the completion of testing. [Regulation 19, §19.702 and/or Regulation 18, §18.1002 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
8. The permittee will provide: [Regulation 19 , §19.702 and/or Regulation 18 , §18.1002 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
 - a. Sampling ports adequate for applicable test methods
 - b. Safe sampling platforms
 - c. Safe access to sampling platforms
 - d. Utilities for sampling and testing equipment
9. The permittee will operate equipment, control apparatus and emission monitoring equipment within their design limitations. The permittee will maintain in good condition at all times equipment, control apparatus and emission monitoring equipment. [Regulation 19, §19.303 and/or Regulation 18, §18.1104 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
10. If the permittee exceeds an emission limit established by this permit, the permittee will be deemed in violation of said permit and will be subject to enforcement action. The Department may forego enforcement action for emissions exceeding any limits established by this permit provided the following requirements are met: [Regulation 19, §19.601 and/or Regulation 18, §18.1101 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
 - a. The permittee demonstrates to the satisfaction of the Department that the emissions resulted from an equipment malfunction or upset and are not the result of negligence or improper maintenance, and the permittee took all reasonable measures to immediately minimize or eliminate the excess emissions.
 - b. The permittee reports the occurrence or upset or breakdown of equipment (by telephone, facsimile, or overnight delivery) to the Department by the end of the next business day after the occurrence or the discovery of the occurrence.

- c. The permittee must submit to the Department, within five business days after the occurrence or the discovery of the occurrence, a full, written report of such occurrence, including a statement of all known causes and of the scheduling and nature of the actions to be taken to minimize or eliminate future occurrences, including, but not limited to, action to reduce the frequency of occurrence of such conditions, to minimize the amount by which said limits are exceeded, and to reduce the length of time for which said limits are exceeded. If the information is included in the initial report, the information need not be submitted again.
11. The permittee shall allow representatives of the Department upon the presentation of credentials: [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
 - a. To enter upon the permittee's premises, or other premises under the control of the permittee, where an air pollutant source is located or in which any records are required to be kept under the terms and conditions of this permit;
 - b. To have access to and copy any records required to be kept under the terms and conditions of this permit, or the Act;
 - c. To inspect any monitoring equipment or monitoring method required in this permit;
 - d. To sample any emission of pollutants; and
 - e. To perform an operation and maintenance inspection of the permitted source.
12. The Department issued this permit in reliance upon the statements and presentations made in the permit application. The Department has no responsibility for the adequacy or proper functioning of the equipment or control apparatus. [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
13. The Department may revoke or modify this permit when, in the judgment of the Department, such revocation or modification is necessary to comply with the applicable provisions of the Arkansas Water and Air Pollution Control Act and the regulations promulgated the Arkansas Water and Air Pollution Control Act. [Regulation 19, §19.410(A) and/or Regulation 18, §18.309(A) and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
14. This permit may be transferred. An applicant for a transfer must submit a written request for transfer of the permit on a form provided by the Department and submit the disclosure statement required by Arkansas Code Annotated '8 1 106 at least thirty (30) days in advance of the proposed transfer date. The permit will be automatically transferred to the new permittee unless the Department denies the request to transfer within thirty (30) days of the receipt of the disclosure statement. The Department may deny a transfer on the basis of the information revealed in the disclosure statement or other investigation or, deliberate falsification or omission of relevant information. [Regulation 19, §19.407(B) and/or Regulation 18, §18.307(B) and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]

Kimberly-Clark Corporation - Maumelle

Permit #: 1306-AR-7

AFIN: 60-00915

15. This permit shall be available for inspection on the premises where the control apparatus is located. [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
16. This permit authorizes only those pollutant emitting activities addressed herein. [A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
17. This permit supersedes and voids all previously issued air permits for this facility. [Regulation 18 and 19 and A.C.A. §8-4-203 as referenced by A.C.A. §8-4-304 and §8-4-311]
18. The permittee must pay all permit fees in accordance with the procedures established in Regulation No. 9. [A.C.A §8-1-105(c)]

Public Notice

Pursuant to A.C.A. §8-4-203, and the regulations promulgated thereunder, the Air Division of the Arkansas Department of Environmental Quality gives the following notice:

Kimberly-Clark Corporation owns and operates an infant care product manufacturing facility (NAICS 313230) located at 500 Murphy Drive in Maumelle, AR. This permit modification adds estimated stack plant emissions of VOCs, including trace amounts of HAPs, to the current permitted emissions from identified point sources, bringing permitted VOC emissions up to 95.6 tpy from 78.9 tpy. These emissions are from waste material that is not shipped out as finished product.

The application has been reviewed by the staff of the Department and has received the Department's tentative approval subject to the terms of this notice.

Citizens wishing to examine the permit application and staff findings and recommendations may do so by contacting Doug Szenher, Public Affairs Supervisor. Citizens desiring technical information concerning the application or permit should contact, Lloyd Davis, Engineer. Both Doug Szenher and Lloyd Davis can be reached at the Department's central office, 8001 National Drive, Little Rock, Arkansas 72209, telephone: (501) 682-0744.

The draft permit and permit application are available for copying at the above address. A copy of the draft permit has also been placed at the Little Rock Public Library located 100 South Rock, Little Rock, AR 72201. This information may be reviewed during normal business hours.

Interested or affected persons may also submit written comments or request a hearing on the proposal, or the proposed modification, to the Department at the above address Attention: Doug Szenher. In order to be considered, the comments must be submitted within thirty (30) days of publication of this notice. Although the Department is not proposing to conduct a public hearing, one will be scheduled if significant comments on the permit provisions are received. If a hearing is scheduled, adequate public notice will be given in the newspaper of largest circulation in the county in which the facility in question is, or will be, located.

The Director shall make a final decision to issue or deny this application or to impose special conditions in accordance with Section 2.1 of the Arkansas Pollution Control and Ecology Commission's Administrative Procedures (Regulation #8).
