Re: NPDES Permit Number: AR0021768, AFIN-58-00105, CAO 22-088
Quarterly Progress Report No. 8

Dear Ms. Wilcox:

In accordance with the requirements of CAO 22-088, on behalf of City Corporation – Russellville Water and Sewer (RCC), please accept this quarterly progress report.

The Pollution Control Works (PCW) continues to be operated consistently with the requirements of the Interim Operations Plan to mitigate risk of permit violation. The design of peak flow improvements are underway with the intent that the project be completed before the October 1, 2025, compliance deadline in the Corrective Action Plan's milestone schedule. The PCW's effluent compliance has improved over the past quarter. A replacement PAA pump is scheduled to be installed this month to simplify operations and improve plant disinfection efficacy. The updated plant SCADA system continues to be dialed in to improve operational efficiencies.

Please do not hesitate to contact me or Greg Kremers with any questions or concerns.

Respectfully Submitted,

HAWKINS-WEIR ENGINEERS, INC.

Aaron M. Benzing, P.E.
