## Davidson Wastewater Treatment Plant

320 Davidson Drive  
Hot Springs, Arkansas 71901

Leslie,

Good afternoon. As you are aware, the Davidson Wastewater Treatment Plant (Permit Number AR0033880) is currently under construction to increase design flow treatment from 12MGD to 16MGD. Part of the improvements include a rehab of the Aeration Basin. Beginning next Monday, March 17<sup>th</sup> 2025, one of our three basins will be taken offline. As a result, in the interim, design flow treatment will decrease to approximately 8 MGD.

Flow limitations and rain events will result in the need to blend flow more often. Best Management Practices (BMP's) will be implemented for the facility during this flow limitation period. Completion of Aeration Basin rehab should be complete by the end of the year.

If you have any questions, please let me know.

Thank you,

Harold Mauldin  
Facilities Operations Manager  
City of Hot Springs
