Progress Report – Hot Springs Creek Pump Station**

Dear Ms. Allen-Daniel,

Again this month, there are no new changes to this report.

All manholes in the affected area near the Hot Springs Creek Pump Station had no SSO's in the month of April.

All valves and accessories are in storage at our Adams Street facility. The new 300 HP Cornell pumps still ship in August 2024. When a delivery date is more established, CHS will bid installation of all equipment. Crist Engineers, Inc. is working on construction/installation plans for the construction. Odor control is still under consideration and pending installation of the new pumps.

Should you have any questions, please contact me at mledbetter@cityhs.net.

Sincerely,

Monty Ledbetter
Utilities Director
