Mr. Anderson,

Just want to give you a quick update on the sewer re-hab project on the gravity line from the landfill to S. Pianalto lift station. We finally have the manhole lining crew on site this week. As noted in the SSES by CK Civil, there were a few manholes that needed to be lined. On the attached map I have indicated the ones that are in the process of being lined. At this point, all manholes have been pressure washed and coated with a cement lining. Two manholes have been completed with the epoxy coating. The remaining manholes will be coated next week. I will let you know when this process is complete. If you have any questions feel free to contact me.

Thank you,

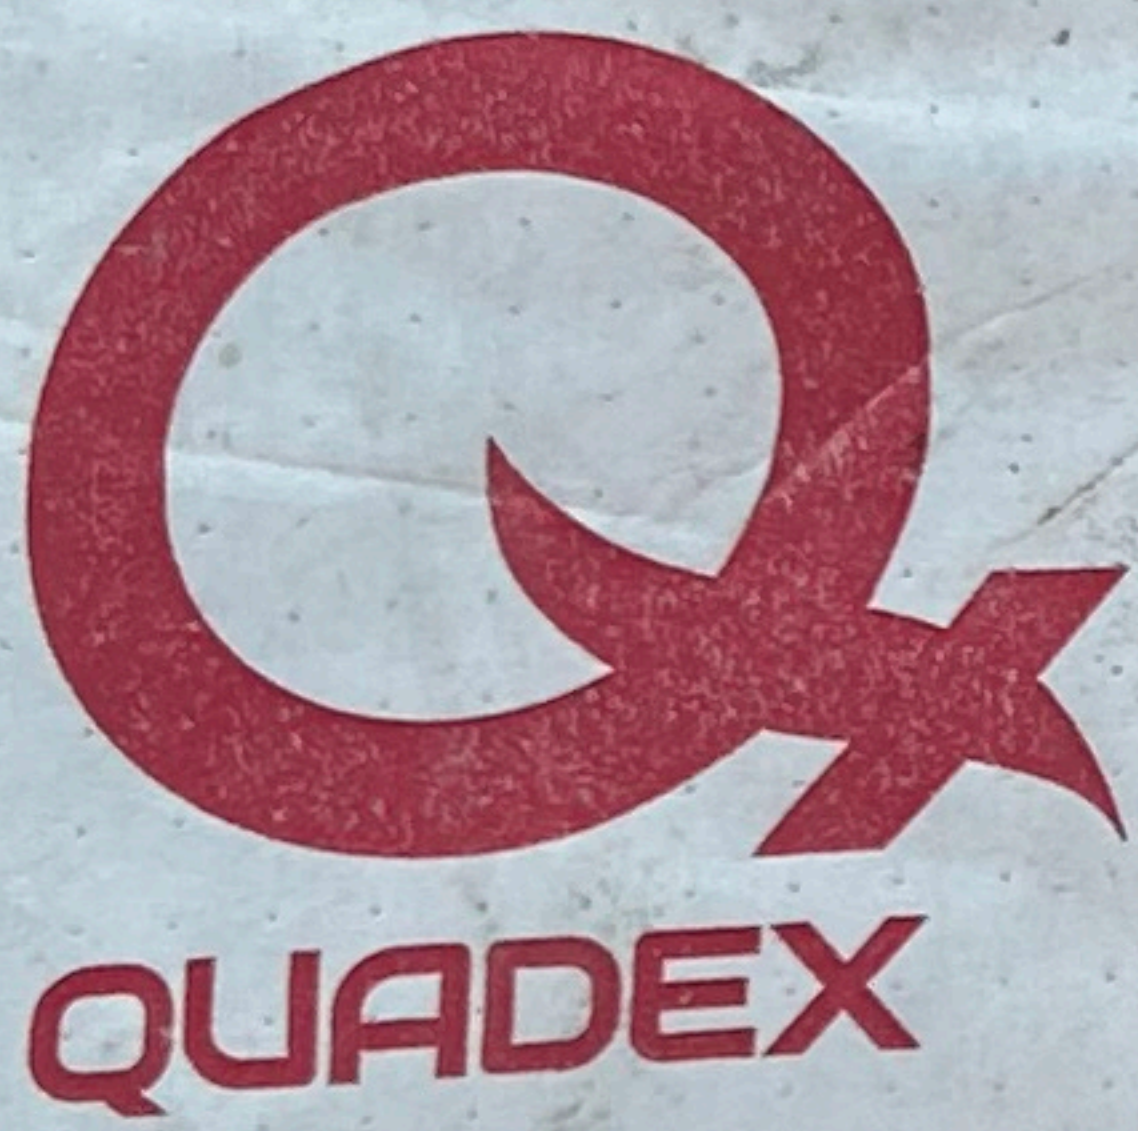

James Clark
