Subject: Request for extension - Overfill Removal - Garland County Class 4 Landfill, Permit No. 0300-S4, AFIN: 26-00405
Attachments: Overfill Exhibit.pdf

Hi Mr. Isaacs!

Pursuant to your approvals for the Overfill Management Plan and the temporary second working face for the referenced facility, Garland County had a contractor remove overfill from the north end of Phase 2, as proposed in the overfill management plan. Contractor activities followed by verification survey services were completed on or before April 28th. After the verification survey, a few cut areas still remained that need to be addressed (see attached). The County intends to finish the fine grading in the overfill area with their equipment and respectfully requests an extension until June 27th to complete the excavation activities and provide a final verification survey and overfill removal report for the north overfill removal phase. Thank you for your consideration in this matter.

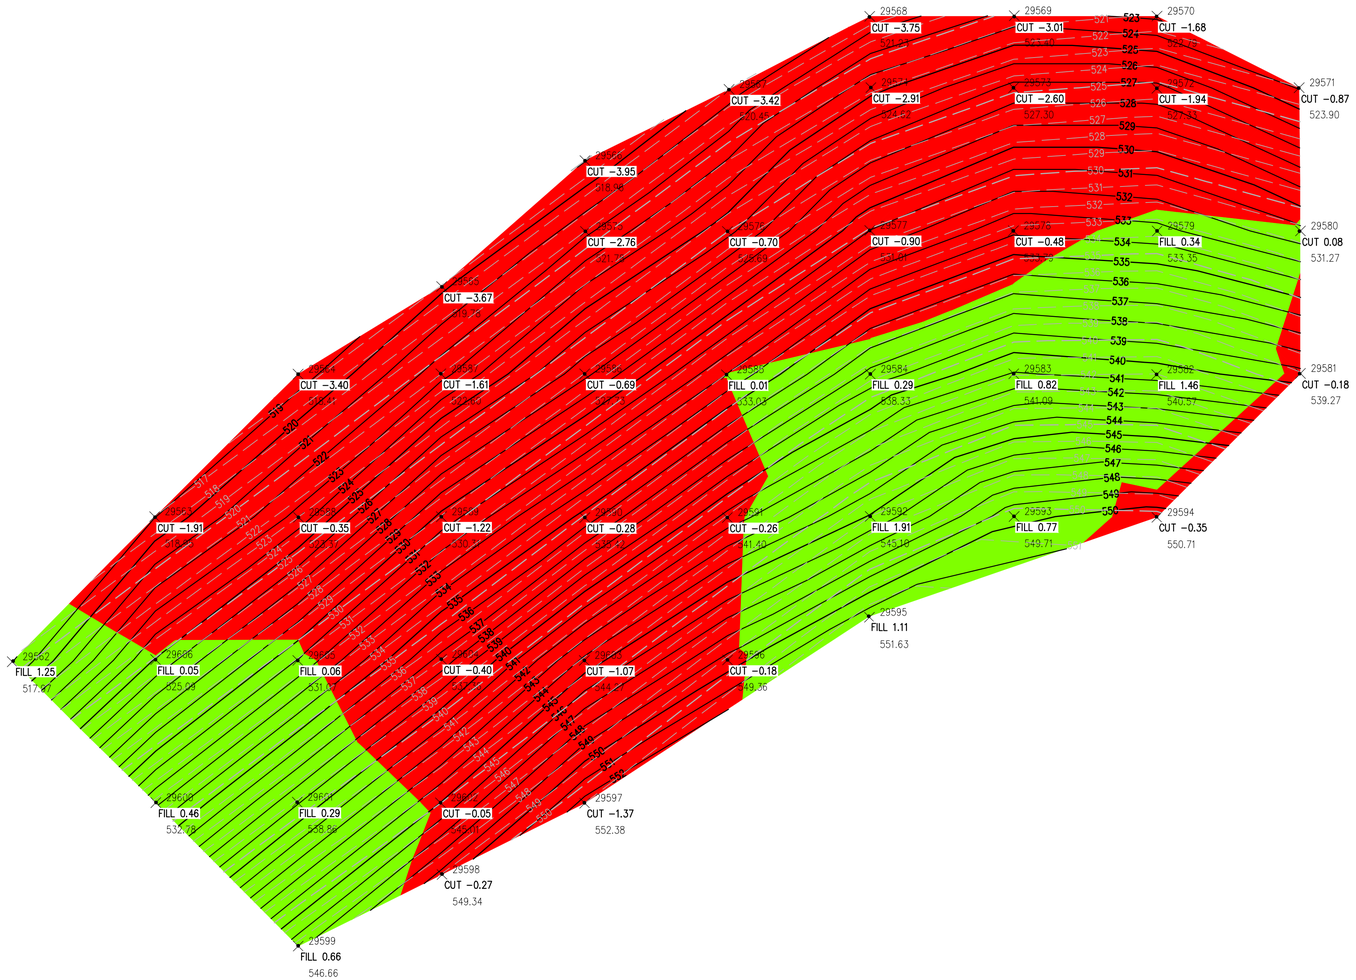

The County is also soliciting bids for the construction of Phase 3 – Cell 1 and the west area Partial Closure at this time. A notice of construction will be sent once the bids are received and a contract awarded. The Partial Closure portion of the contract will address the overfill areas along the west side that were identified in the Overfill Management Plan. If you have any questions or need any additional information, please do not hesitate to contact John Rogers with Crafton Tull or me.

Best regards,
Owen
