Good afternoon Mr. Isaacs!

Garland County is in receipt of your NOD letter dated November 5, 2024 regarding the Minor Permit Modification Application (Doc ID 85232). Thank you for your review and consideration of the submitted application. Upon further developments and considerations, the County has elected to withdraw the application from consideration by the Division. Please rescind our application and archive our related correspondence at this time. The County may develop an application at a later date for implementation of GCL or other geosynthetic(s) into the final cover components of the Class 4 landfill as an option.

The County has identified suitable clay deposits that are available for upcoming construction at the landfill and therefore expect to realize some cost savings versus their previous analysis. If you have any questions or need any additional information, please do not hesitate to contact John Rogers or me.

Best regards,
Owen
